## HT UniLift Trailer

### Multi-purpose demount trailer system

#### Why choose the HARSH HT UniLift Trailer?

Simple - you only need one chassis to move many different pieces and types of bodywork. Particularly suited to agricultural applications, the HARSH UniLift system offers immediate advantages not only in its versatility, but also in significant cost savings by dramatically improving efficiency of operation.

For example, an open-topped container can be dropped off at one location with the tractor and hooklift trailer then picking up another piece of bodywork to work elsewhere. With UniLift, there's now no need to buy every trailer with its own chassis and wheels.

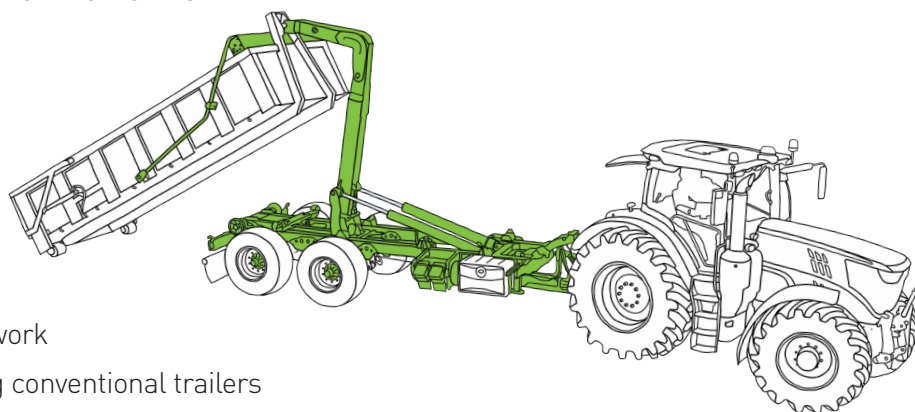

A system long-established and proven in Europe, HARSH UniLift Trailers offer enormous benefits to all types of operators in the UK.

**versatility**

#### HT UniLift Trailer, Features & Benefits

- The leading product in its class
- Tip / lift capacity from 8 to 30 tonnes
- Light weight, for optimum payload
