SS Sheeting Systems

Flip n' Go for Rigid, 7.5 - 32 Tonnes GVW

Why choose HARSH Flip n' Go?

HARSH Flip n' Go is the easiest and most practical of all sheeting systems, designed to cover awkward and uneven loads at the touch of a button.

Electrically operated from inside the cab, Flip n' Go is stored in a compact roll at the front of the tipper body, then cantilevers upwards and rearwards in an operation that takes just seconds. By this action Flip n' Go has the ability to safely contain all types of randomly shaped loads such as muck, demolition waste and recycled materials.

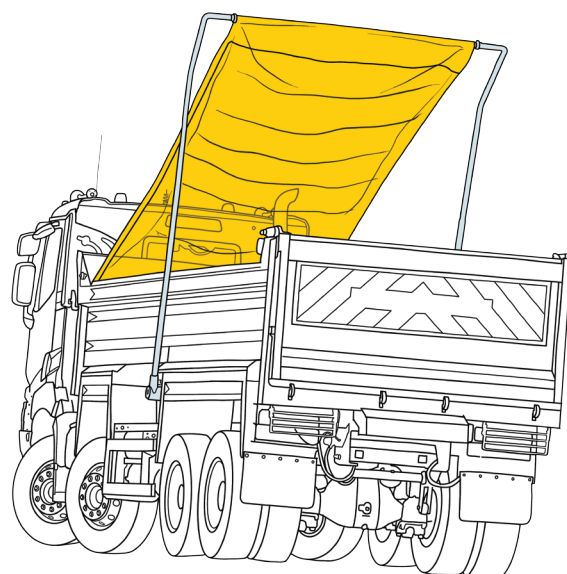

With the sheet made from ultra-durable mesh, Flip n' Go is also very light - a key factor that helps make it the most popular model in the HARSH sheeting range.

security

Flip n' Go Features & Benefits

- Fast acting, front to rear cantilever operation
- Suitable for all types of irregular loads
- Robust design, yet light in weight
- Easy to fit and maintain
- A totally practical sheeting solution

Flip n' Go Specifications

- Front to rear electric sheeting system with super-tough mesh sheet
- Available to fit all sizes and types of tipper body
